the them of Communication). Miniatry of Communication. Miniatry of Communication. It takes over the administration and operation of railroads when they have been completed by a legar.

- 2. Q. Mos Pachorn a bir prison comp?
 - A. When I left there were about 50 thousand pricesers, and everybedy worked on the relived. In addition, 20% of the relived northers were supplied by the Ministry of Communications. Sees of these relived non, superially in 1942 and 1943, were free people from the feltic countries. They received a very decent valuey. But woot of the conflictors, firesen and engineers were supplied from the three temperaturies of the case and had been rail-read workers before coccain; pricesors. They used to travel from their house station to the next relived transport unit, and then so bear on the next train. The first transport unit was in Pecheva, the smooth in Redmes, and the third in Siveya Macka.
- 3. 6. There was the headquarters of the emp?
 - A. The name of Pechain Prison Camp applies to the entire dictance from the Pechanniver to Verkuth, but the headquarters of the campuse in about a town of sin or coven thousand population. This is there the equipment and supplies are located. There is another supply contex at Pechana. There were construction sub-divisions with headquarters at Kac-Tu and Kochmen. There were five encirculated divisions in all. I Presumably at Pechain, Kan-Tu, Kochmen, and Verkuth. There was a waterways unit of Pechag at Kanen Nos, four he work of the relired on the Pechanniver. Three has from the rail-read, on the east land, is a large forest combine called Les Kombinat, which belongs to Pechag. There was also a coal mining command at Intiag / Inte/, but that was a separate administration, under GULAG.
- 4. Q. How about the prison format
 - We largest delay form of the whole Pockern Prices Comp is called Fion.
 It is not be not of Aber. There are other dairy forms just south of the railroad on the cost tank of the Peckers, eight he appaream from the railroad on the river Stays, and about 10 he from the bridge which grouped the Reshir river. The prison comp also has a reinformation found 10 he northeast of Siveye Basha, and a lumber will on the Peckers river. The Intless coal mine has a separate dairy form, at Skedrovachia.
- 5. Q. What do they do with the prisoners when construction in finished?

-ond--

A. When the Peckern road is finished they will send many of them to Siberia, especially the long-term prisoners the cannot no back to one of the loss severe compt in the interior of Russia. Many of the prisoners at Peckern were sent there then the railroad at Maranck was finished. Some of them there have to the Canacaus to work on a railroad there. They were sent from one coup to unother by the fiveinless.
